

MyTuitionScore is a unique and comprehensive preparation tool for families with children in the college planning phase. MyTuitionScore takes the overwhelming and extraneous amounts of information and narrows it down to the most critical aspects of college spending specific to their family.

There is no other college preparation tool on the market that merges financial methodology with educational guidance in the way that MyTuitionScore does.

What does a MyTuitionScore Report include?

The MyTuitionScore Report will include crucial information such as:

- ✔ **Your students' Expected Family Contribution (EFC)** — the minimum amount their family is "expected" to contribute towards the cost of college — and more importantly, an explanation of what it means, how it applies to the "actual" contribution amount, and how that will affect the overall cost to attend a selected school
- ✔ **A Financial aid checklist** that helps guide you through the process
- ✔ **The money needed at the time college will begin.** This is based on current and future available savings allocated for college, cash flow, need-based aid available (never guaranteed) at the selected school, historic school generosity percentages, and the family EFC
- ✔ **The total gross cost of the selected school,** based on future projected costs for the years that the student will attend
- ✔ **Up to 9 suggestions for colleges** in their desired geographic area that most likely provide a return on college investment upon graduation — i.e. they will experience a higher likelihood of getting placed in a job in a chosen field at, or near, the top of the pay range
- ✔ **Tips on the entire college planning process,** including myths versus truths. These tips help families easily avoid costly mistakes in the complex financial aid process
- ✔ **Our proprietary college loan manual,** which highlights college loan options, providing a full analysis of each
- ✔ **A full scholarship overview** of what is available to the family and where to get these monies
- ✔ **Financial aid video with a wide variety of helpful tips**
- ✔ **Valuable information** that can unlock exciting, money-saving opportunities at higher priced schools the student's family may not have considered
- ✔ **Access to SAT/ACT prep**
- ✔ **Access to variety of student assessments**
